IRANKUNDA ELISSA

ATAS CO-FOUNDER

PROJECTS

AcademiaPlus AI-Powered Education Platform

- A system for teachers with automated grading, quiz generation, and student analytics.
- Integrated LLM-based agents to streamline coursework and improve teacher efficiency.

Kinyarwanda TTS Lacal Language Text-to-Speech Model

- Built a custom Kinyarwanda speech synthesis model for accessibility and inclusive learning.
- Fine-tuned neural TTS architectures to support natural, clear, and culturally aligned voice output.
- Enabled integration into educational platforms and language-learning tools.

ABOUT ME

Elyssa is A forward-driven software developer and emerging data scientist passionate about building AI-powered solutions that make learning, work, and communities smarter. He is Skilled in modern development tools and machine learning techniques, with a strong focus on creating technologies that solve real challenges and deliver meaningful impact

SKILLS

- Python & JavaScript Development
- Machine Learning Model Development
- Data Analysis & Visualization
- AI Systems Integration
- Web Development (Django, React)
- Version Control (Git & GitHub)
